IN THE CLAIMS

- 1. (Cancelled).
- 2. (Previously Presented) A method according to claim 14, comprising implementing the vapor deposition at temperatures between 50°C and 300°C and a pressure between 0.001 Pa and 3 Pa.

Claim 3 has been amended as follows:

3. (Currently Amended) A method according to claim 14 comprising implementing a temperature treatment of cooling the luminophore layer after said vapor deposition and thereafter tempering the luminophore layer the vapor deposition and a cooling.

Claim 4 has been amended as follows:

4. (Currently Amended) A method according to claim 3, comprising implementing the temperature treatment after wherein the step of cooling the luminophore layer comprises cooling the luminophore layer at room temperature in the presence of water vapor.

Claim 5 has been amended as follows:

5. (Currently Amended) A method according to claim 3 comprising implementing the temperature treatment wherein the step of tempering the luminophore layer comprises tempering the luminophore layer in a range from 100°C to 300°C.

Claim 6 has been amended as follows:

6. (Currently Amended) A method according to claim 3, comprising implementing the temperature treatment wherein the step of tempering the luminophore layer comprises tempering the luminophore layer in a mixture of inert gas and water vapor.

Claim 7 has been amended as follows:

7. (Currently Amended) A method according to claim 3, comprising implementing the temperature treatment wherein the step of tempering the luminophore layer comprises tempering the luminophore layer in humid air.

Claim 8 has been amended as follows:

8. (Currently amended) A method according to claim 14, comprising using $Cs_xEu_yBr_{(x+2y)}$ as said alkali halogenide halide phase and using CsBr as said alkali halogenide halide, to form an x-ray storage luminophore CsBr: $Cs_xEu_yBr_{(x+2y)}$ as said luminophore layer.

Claim 9 has been amended as follows:

9. (Currently amended) A method according to claim 14 comprising simultaneously vaporizing a quantity x of the alkali-halogenide halide phase and a quantity (600g -x) (600-x) grams of the alkali halogenide halide.

Claim 10 has been amended as follows:

10. (Currently amended) A method according to claim 14, comprising mixing the alkali halogenide halide phase and the alkali halogenide halide and introducing the mixture into a vaporization vessel for vaporization thereof.

Claim 11 has been amended as follows:

11. (Currently Amended) A method according claim 14 comprising separately introducing the alkali halogenide halide phase and the alkali halogenide halide into respective vaporization vessels and simultaneously vaporizing said alkali halogenide halide phase and said alkali halogenide halide in the respective vacuum

Claim 12 has been amended as follows:

vessels.

12. (Currently amended) A needle-shaped x-ray luminophore <u>layer</u> with at least one alkali metal, produced according to the method according claim 14 having the formula:

$$\begin{split} \left(\!\!\left(\!M^{\text{\tiny{1^+}}} H^{\text{\tiny{1^-}}}\right)_{\!a} \!\left(\!M^{\text{\tiny{1^+}}} H^{\text{\tiny{1^-}}}\right)_{\!a} \! \cdot \! \left(\!M^{\text{\tiny{1^+}}} {}_x S^{z_+} {}_y H^{\text{\tiny{1^-}}} {}_x H^{\text{\tiny{1^-}}} {}_z^{*_y}\right)_{\!b} \! \left(\!M^{\text{\tiny{1^+}}} {}_x S^{z_+} {}_y H^{\text{\tiny{1^-}}} {}_x H^{\text{\tiny{1^-}}} {}_z^{*_y}\right)_{\!c} \\ & \left(\!M^{\text{\tiny{1^+}}} {}_x S^{z_+} {}_y H^{\text{\tiny{1^-}}} {}_x H^{\text{\tiny{1^-}}} {}_z^{*_y}\right)_{\!d} \! \left(\!M^{\text{\tiny{1^+}}} {}_x S^{z_+} {}_y H^{\text{\tiny{1^-}}} {}_x H^{\text{\tiny{1^-}}} {}_z^{*_y}\right)_{\!c} \end{split}$$

wherein M*-is-at-least-one M'*- and M"*- are respective metal ion ions selected from the group consisting of Na, K, Rb and Cs, H*-is at-least-one halogenide H*-, H"*- and H"*- are respective halogens selected from the group consisting of F, Cl, Br and I, and Sz*- is at least one lanthanide ion selected from the group consisting of La, Ce, Pr, Nd, Pm, Sm, Eu, Gd, Tb, Dy, Ho, Er, Tm, Yb or Lu.

Claim 13 has been amended as follows:

13. (Currently Amended) An x-ray luminophore <u>layer</u> according to claim12. comprising an x-ray storage luminophore <u>layer</u> having the formula:

$$CsBr : Cs_xEu_yBr_{(x+2y)}$$

- 14. (Currently Amended) A method for producing a luminophore comprising the steps of:
 - in a vaporization phase, simultaneously vaporizing an alkali halogenide halide

 phase with and an alkali halogenide halide and thereby producing vaporized material; and
 - vacuum-depositing said vaporized material on a substrate and thereby producing a needle-shaped x-ray luminophore <u>layer</u> having at least one alkali metal on said substrate.
